

INTRODUCTION TO SHAMANISM

BUILDING A TOOLKIT OF SHAMONIC TECHNIQUES

WHAT

This introduction to shamanism is a series of 7 classes that will cover the basics of the shamanic toolkit and give the essential keys and skills to build more advanced understanding of this tradition and its role in the basis of modern religions and the world.

While there is a significant amount of lecture and theory the true aim of the class is experiential and with a focus on using these techniques for personal and universal growth and transformation. Each session will have plenty of practice and be expertly guided and carefully walked through in multiple ways.

Some of the topics will include:

- **Clearing and creating space**
- **Working with guides and finding your totem**
- **Fractured Soul Theory and Soul Retrieval**
- **Working with Ancestors and the deep past**
- **Spirit Extraction and dispossession**
- **Working with Divinities and upper realms**
- **And more.**
